

Development of the Upper Missouri River Reservoir Fisheries Management Plan 2000-2009

- Began in late 1998; Finalized in late 1999
- Workgroup attempted to represent all parties with a stake in the management of these reservoirs (minus unaffiliated anglers)
- Eight meetings (two public) over five months
- Plan in compliance with MEPA (public comment, etc.)
- Plan approved by FWP Commission
- Two end results (agreement) and 12 recommendations to FWP

Management Plan Work Group Representatives

- MFWP-Steve Leathe/Bruce Rich

- Trout Interests-Bill Holdorf
- Upstream/Downstream Interests-Bruce Farling
- Walleye Interests-Mike Sedlock

Management Plan Work Group

End Result #1

- The fisheries management goal for this three-reservoir system should be to managed as a high quality, cost-effective, multi-species fishery with high levels of angler satisfaction. This will be a difficult goal to achieve.

Management Plan Work Group

End Result #2

- The process for monitoring and evaluating the implementation of the new 10-year plan should be open to the public and other affected parties.

Rainbow Trout Evaluation

2003 Rainbow Marking

- **200,000 Arlee Fin Clipped (Hauser and Holter)**
- **100,000 Eagle Lake Coded Wire Tagged (Hauser)**

Rainbow Trout stocking vs. recruitment to fall gillnets Hauser Reservoir (1996-2002)

Yr of Release	# Stocked (x1,000)	Strain	Size @ Release	Month of Release	Return Index*
1996	94.2	A	5"	July	9.3
1997	98.7	A	5"	July	8.1
1998	98.2	A	5"	July	9.2
1999	174.3	A:EL	3.7"/5"	July	2.4

Dissolved Oxygen Update

- BOR will continue to monitor water quality below Canyon Ferry Dam
- Efforts will continue in 2004 to try air injection into turbines

Impacts of Low DO

(Other Studies)

- Severe O₂ stress below 4.16mg/l (Davis 1975)
- Reduced swimming performance in salmon (Kutty and Sanders 1973)
- Reduced angler success rates for rainbow trout (Weithman and Haas 1984)
- DO's influence on predator/prey overlap (Pientka and Parrish 2002; Breitburg et al. 1997)
